SOFTFLAME

SOFTFLAME or also called regular flame is the most common of all known flame types. It is generated by a piezo or flint wheel ignition. The optimum height of a softflame is approx. 3cm.

COLORFUL TURBOFLAME

TURBOFLAME The windproof burning behaviour is the mark of distinction of turbo flames. Above a nozzle the lighter gas is mixed with air, swirled inside the diffuser and ignited by an electrode. The mixture burns like a Bunsen burner with great heat, but without a visible flame. In general the same technique as used for the classic turbo flame. The only difference is the special magnesium wire that creates the interesting colorful flame.

JETFLAME

JETFLAME is probably the hottest flame available at present. Due to the fact that gas and air are swirled above a nozzle through a special burner type, the sharp and pointed flame is created. And such JETFLAME is normally use for cigars or other professional ways.

To pass the **HEAT TEST** lighters have to withstand 4 hours in a special oven at 65°C. Thereby they may not get any splits or leaks of gas.

The **DROP TEST** indicates the ability of the lighter to withstand safely a drop from 1.5 m in a group of concrete without splitting.

According to the outside temperature the **FLAME HEIGHT** of lighters varies in use. The maximum flame height may not exceed 10 cm.

The **ISO22702** is a world-wide valid Norm which states the demands within the general product safety for utility lighters. It consists basically on three test methods (**HEAT TEST, DROP TEST, FLAME HEIGHT**) that an utility lighter has to pass before being placed on the market. **ISO22702** certification can be provided upon request.

All **FLAMECLUB** packs carry the **ISO22702 Norm** required warning and safety pictograms clearly printed.

FLAMECLUB utility lighters are produced in **TÜV** monitored factories. All the production must pass stringent certified and integrated quality management.

DESCRIPTION

UTILITY MicroTorch

Dear Clients,

Thank you for looking the high quality Utility Burner by FLAMECLUB. It's a wise choice and one that will prove the test of time as a durable top quality product. To make sure you get optimum results and long-lasting service from our Utility Burner, we will provide some important information plus tips for optimal use and aftercare, as well as safety guidelines.

Outstanding product features at a glance:

The Utility Burner from FLAMECLUB is a reliable and durable flame appliance for producing caramel from all types of sugar on desserts such as Crème Brûlée, Crema Catalana or even ice cream (which maintains its cold temperature under a sugar layer), as well as for vegetables or meat. The Utility Burner is ideal for browning meringues, topping off gratin and removing skin from tomatoes or peppers.

- > Adjustable gas dial for controlled application
- > Quick and professional use providing flame temperatures up to 1.300°C / 2.340°F.
- > TÜV approved safety features through safety switch (child resistant locking system).
- > Superior grade gas valve for regular and reliable refilling
- > Easy refilling with commonly available lighter gas
- > Long use with large capacity reservoir of 42ml / 1.4oz. (Propane/Butane) providing approx.60 to 70 minutes flame duration.
- > Flexible application hand held or positioned firmly on its stand base.
